Digital Speech Coding for Low Bit Rate Communications Systems A. M. Kondozi University of Surrey UK  
Speech communication is still the dominant service in telecommunications networks. However, modern information requirements, such as multimedia, satellite and mobile communications, have created the need for a more robust and flexible alternative to the traditional analogue system. Digital speech transmission offers many advantages over its analogue counterpart, including consistent quality, versatility, security and successful integration into ISDN. This topical book provides an in-depth account of the latest developments in digital speech coders specifically designed for use in the evolving communications systems. Features include:

- \* Fundamental material on sampling and quantisation.
- \* Detailed coverage of speech signal analysis and modelling.
- \* An examination of the key tools for speech coding.
- \* Essential guidance on coding strategies and standards.
- \* A review of a wide range of speech coding techniques, such as low delay speech coding and multi-band excitation speech coders.
- \* Important information on error control in speech transmission.
- \* A comprehensive assessment of system applications and real-time implementations, including unique coverage of the important code-excited linear prediction (CELP) method of speech coding.

A complete examination of the theoretical design and practical applications of speech coders, this book will be invaluable for practising communications engineers, network designers and computer scientists.

Advanced students in electrical, electronic and communications engineering, computer networking and digital signal processing will also find this text a helpful reference source.

**From reader reviews:**

**Martin Elkins:**

Information is provisions for those to get better life, information currently can get by anyone with everywhere. The information can be a expertise or any news even a huge concern. What people must be consider while those information which is within the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you obtain the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Digital Speech: Coding for Low Bit Rate Communication Systems (Wiley Series in Communication and Distributed Systems) as the daily resource information.

**Michael Taylor:**

Spent a free time and energy to be fun activity to perform! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, gonna beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Could be reading a book could be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled Digital Speech: Coding for Low Bit Rate Communication Systems (Wiley Series in Communication and Distributed Systems) can be excellent book to read. May be it is usually best activity to you.

**Judith Smith:**

This Digital Speech: Coding for Low Bit Rate Communication Systems (Wiley Series in Communication and Distributed Systems) is great publication for you because the content that is full of information for you who also always deal with world and possess to make decision every minute. This particular book reveal it information accurately using great organize word or we can declare no rambling sentences included. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with wonderful delivering sentences. Having Digital Speech: Coding for Low Bit Rate Communication Systems (Wiley Series in Communication and Distributed Systems) in your hand like keeping the world in your arm, information in it is not ridiculous a single. We can say that no publication that offer you world inside ten or fifteen moment right but this publication already do that. So , this is good reading book. Hey Mr. and Mrs. active do you still doubt in which?

**Joshua Little:**

Is it anyone who having spare time and then spend it whole day by simply watching television programs or just laying on the bed? Do you need something new? This Digital Speech: Coding for Low Bit Rate Communication Systems (Wiley Series in Communication and Distributed Systems) can be the response, oh

how comes? It's a book you know. You are thus out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
