## The Economics of Joan Robinson (Routledge Studies in the History of Economics)

Joan Robinson is widely regarded as the greatest female economist and the most important figure in the post-Keynesian tradition. In this volume a distinguished, international team of scholars analyses her extraordinary wide ranging contribution to economics.

Various contributions address:

- \* her work on the economics of the short period and her critique of Pigou
- \* her contribution to the development of the Keynesian tradition at Cambridge
- \* her response to Marx and Sraffa
- \* her analysis of growth, development and dynamics
- \* her comments on technical innovation and capital theory
- \* her preference for 'history' rather than equilibrium as a basis for methodology.

Her published work spanned six decades, and the volume includes a bibliography of her work including some 450 items which will be a major resource for students of the development of modern economic analysis.
