Structural Equation Modeling: Applications in Ecological and Evolutionary Biology

Structural Equation Modeling: Applications in Ecological and Evolutionary Biology

Structural equation modelling (SEM) is a technique that is used to estimate, analyse and test models that specify relationships among variables. The ability to conduct such analyses is essential for many problems in ecology and evolutionary biology. This book begins by explaining the theory behind the statistical methodology, including chapters on conceptual issues, the implementation of an SEM study and the history of the development of SEM. The second section provides examples of analyses on biological data including multi-group models, means models, P-technique and time-series. The final section of the book deals with computer applications and contrasts three popular SEM software packages. Aimed specifically at biological researchers and graduate students, this book will serve as valuable resource for both learning and teaching the SEM methodology. Moreover, data sets and programs that are presented in the book can also be downloaded from a website to assist the learning process.

From reader reviews:

Antonio Haynie:

As people who live in the modest era should be up-date about what going on or info even knowledge to make these individuals keep up with the era which can be always change and move ahead. Some of you maybe may update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what one you should start with. This Structural Equation Modeling: Applications in Ecological and Evolutionary Biology is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

Blanche Watson:

The feeling that you get from Structural Equation Modeling: Applications in Ecological and Evolutionary Biology will be the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It does not mean that this book is hard to comprehend but Structural Equation Modeling: Applications in Ecological and Evolutionary Biology giving you excitement feeling of reading. The writer conveys their point in a number of way that can be understood by anyone who read it because the author of this e-book is well-known enough. This kind of book also makes your vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having that Structural Equation Modeling: Applications in Ecological and Evolutionary Biology instantly.

Mary Kenney:

The actual book Structural Equation Modeling: Applications in Ecological and Evolutionary Biology will bring that you the new experience of reading some sort of book. The author style to explain the idea is very unique. When you try to find new book to learn, this book very ideal to you. The book Structural Equation Modeling: Applications in Ecological and Evolutionary Biology is much recommended to you to see. You can also get the e-book from your official web site, so you can quicker to read the book.

Amy Osburn:

Spent a free time and energy to be fun activity to perform! A lot of people spent their leisure time with their family, or their friends. Usually they performing activity like watching television, going to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Will you something different to fill your free time/ holiday? Could be reading a book could be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to test look for book, may be the guide untitled Structural Equation Modeling: Applications in Ecological and Evolutionary Biology can be excellent book to read. May be it is usually best activity to you.
