These Proceedings contain both oral and poster contributions to the first international conference "Field Screening Europe - Strategies and Techniques for On-Site Investigation and Monitoring of Contaminated Soil, Water and Air", held in Karlsruhe September 29 - October 1, 1997. Environmental monitoring and the assessment of chemical contaminations are becoming more and more important. The integrated study of environmental contamination in the field is a rather recent approach. "Field screening" indicates such field analytical tools, (quick) methods and strategies for on-site or in-situ environmental analysis and assessment of contamination. The classical strategy for investigating contaminants consists of the following steps: site studies, sampling, sample transport to the laboratory, sample preparation, and analysis. This strategy is rather expensive and time consuming. Some investigations, including sample preparation, may last several days. In many cases, the results must be available immediately and are of importance for further decisions. Field screening is an alternative or complement to this strategy that attempts to be cheaper and faster and may achieve the same quality of results. The most important argument for field analytical methods is that the superior accuracy and high costs of laboratory methods are disproportional to the possibility of artifacts from sampling and errors originating from spatial variations of contaminants.

From reader reviews:

Katie Martinez:

Book is written, printed, or highlighted for everything. You can learn everything you want by a book. Book has a different type. To be sure that book is important matter to bring us around the world. Close to that you can your reading talent was fluently. A book Field Screening Europe: Proceedings of the First International Conference on Strategies and Techniques for the Investigation and Monitoring of Contaminated Sites will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading any book make you bored. It's not make you fun. Why they can be thought like that? Have you seeking best book or ideal book with you?

Anna Gann:

The e-book untitled Field Screening Europe: Proceedings of the First International Conference on Strategies and Techniques for the Investigation and Monitoring of Contaminated Sites is the reserve that recommended to you you just read. You can see the quality of the publication content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of study when write the book, therefore the information that they share to your account is absolutely accurate. You also might get the e-book of Field Screening Europe: Proceedings of the First International Conference on Strategies and Techniques for the Investigation and Monitoring of Contaminated Sites from the publisher to make you a lot more enjoy free time.

Sharonda Adair:

Often the book Field Screening Europe: Proceedings of the First International Conference on Strategies and Techniques for the Investigation and Monitoring of Contaminated Sites has a lot of information on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. Tom makes some research ahead of write this book. This book very easy to read you can obtain the point easily after scanning this book.

Virginia Comer:

Is it anyone who having spare time and then spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Field Screening Europe: Proceedings of the First International Conference on Strategies and Techniques for the Investigation and Monitoring of Contaminated Sites can be the response, oh how comes? The new book you know. You are therefore out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?
