**DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission** Sandy Antunes

Want to build your own satellite and launch it into space? It's easier than you may think. The first in a series of four books, this do-it-yourself guide shows you the essential steps needed to design a base picosatellite platform—complete with a solar-powered computer-controlled assembly—tough enough to withstand a rocket launch and survive in orbit for three months.

Whether you want to conduct scientific experiments, run engineering tests, or present an orbital art project, you'll select basic components such as an antenna, radio transmitter, solar cells, battery, power bus, processor, sensors, and an extremely small picosatellite chassis. This entertaining series takes you through the entire process—from planning to launch.

- Prototype and fabricate printed circuit boards to handle your payload
- Choose a prefab satellite kit, complete with solar cells, power system, and on-board computer
- Calculate your power budget—how much you need vs. what the solar cells collect
- Select between the Arduino or BasicX-24 onboard processors, and determine how to use the radio transmitter and sensors
- Learn your launch options, including the providers and cost required
- Use milestones to keep your project schedule in motion

### **From reader reviews:**

#### **Luke Palmieri:**

Book is to be different per grade. Book for children until finally adult are different content. To be sure that book is very important for us. The book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission ended up being making you to know about other know-how and of course you can take more information. It is rather advantages for you. The guide DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission is not only giving you more new information but also to become your friend when you experience bored. You can spend your own personal spend time to read your publication. Try to make relationship together with the book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission. You never experience lose out for everything when you read some books.

#### **Hye Elliott:**

Typically the book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission has a lot info on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. The writer makes some research previous to write this book. This book very easy to read you may get the point easily after scanning this book.

#### **Virginia Kang:**

A lot of guide has printed but it takes a different approach. You can get it by online on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by searching from it. It is identified as of book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission. Contain your knowledge by it. Without leaving the printed book, it can add your knowledge and make an individual happier to read. It is most essential that, you must aware about publication. It can bring you from one destination to other place.

#### **Jeff Weaver:**

Some people said that they feel bored when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose often the book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission to make your current reading is interesting. Your skill of reading expertise is developing when you including reading. Try to choose basic book to make you enjoy to study it and mingle the idea about book and looking at especially. It is to be 1st opinion for you to like to open up a book and study it. Beside that the publication DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission can to be your brand new friend when you're really feel alone and confuse with what must you're doing of their time.
