Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

From reader reviews:

Linda Yohe:

What do you ponder on book? It is just for students since they're still students or this for all people in the world, what best subject for that? Only you can be answered for that problem above. Every person has several personality and hobby for every single other. Don't to be forced someone or something that they don't desire do that. You must know how great and important the book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services). All type of book can you see on many solutions. You can look for the internet methods or other social media.

Barbara Fontenot:

Nowadays reading books are more than want or need but also turn into a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The details you get based on what kind of guide you read, if you want attract knowledge just go with knowledge books but if you want feel happy read one using theme for entertaining such as comic or novel. The actual Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) is kind of reserve which is giving the reader unforeseen experience.

Alexandra Robbins:

The guide with title Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) includes a lot of information that you can study it. You can get a lot of advantage after read this book. This specific book exist new information the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. That book will bring you with new era of the internationalization. You can read the e-book in your smart phone, so you can read that anywhere you want.

Jose Enriquez:

Are you kind of stressful person, only have 10 or maybe 15 minute in your day time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you have problem with the book than can satisfy your short space of time to read it because this time you only find book that need more time to be read. Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) can be your answer given it can be read by you who have those short spare time problems.
