Fluvial Remote Sensing for Science and Management

Fluvial Remote Sensing for Science and Management

This book offers a comprehensive overview of progress in the general area of fluvial remote sensing with a specific focus on its potential contribution to river management. The book highlights a range of challenging issues by considering a range of spatial and temporal scales with perspectives from a variety of disciplines. The book starts with an overview of the technical progress leading to new management applications for a range of field contexts and spatial scales. Topics include colour imagery, multi-spectral and hyper-spectral imagery, video, photogrammetry and LiDAR. The book then discusses management applications such as targeted, network scale, planning, land-use change modelling at catchment scales, characterisation of channel reaches (riparian vegetation, geomorphic features) in both spatial and temporal dimensions, fish habitat assessment, flow measurement, monitoring river restoration and maintenance and, the appraisal of human perceptions of riverscapes.

Key Features:

- A specific focus on management applications in a period of increasing demands on managers to characterize river features and their evolution at different spatial scales
- An integration across all scales of imagery with a clear discussion of both ground based and airborne images
- Includes a wide-range of environmental problems
- Coverage of cutting-edge technology
- Contributions from leading researchers in the field

From reader reviews:

Lisa Streeter:

Inside other case, little folks like to read book Fluvial Remote Sensing for Science and Management. You can choose the best book if you like reading a book. Given that we know about how is important a book Fluvial Remote Sensing for Science and Management. You can add expertise and of course you can around the world by a book. Absolutely right, mainly because from book you can learn everything! From your country until foreign or abroad you will end up known. About simple issue until wonderful thing you may know that. In this era, we are able to open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's study.

John Espitia:

Book is definitely written, printed, or created for everything. You can recognize everything you want by a guide. Book has a different type. As you may know that book is important issue to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A book Fluvial Remote Sensing for Science and Management will make you to become smarter. You can feel considerably more confidence if you can know about every thing. But some of you think that will open or reading any book make you bored. It is not make you fun. Why they are often thought like that? Have you trying to find best book or appropriate book with you?

Mary Perez:

Fluvial Remote Sensing for Science and Management can be one of your nice books that are good idea. Most of us recommend that straight away because this guide has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to get every word into satisfaction arrangement in writing Fluvial Remote Sensing for Science and Management but doesn't forget the main place, giving the reader the hottest and based confirm resource data that maybe you can be considered one of it. This great information may drawn you into brand-new stage of crucial considering.

David Dabbs:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt this when they get a half areas of the book. You can choose the particular book Fluvial Remote Sensing for Science and Management to make your current reading is interesting. Your own skill of reading expertise is developing when you like reading. Try to choose easy book to make you enjoy to read it and mingle the sensation about book and reading through especially. It is to be 1st opinion for you to like to open a book and go through it. Beside that the book Fluvial Remote Sensing for Science and Management can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of that time.
