Mass Spectrometry of Nucleosides and Nucleic Acids

Mass Spectrometry of Nucleosides and Nucleic Acids

Assembling the work of an international panel of researchers, **Mass Spectrometry of Nucleosides and Nucleic Acids** summarizes and reviews the latest developments in the field and provides a window on the next generation of analysis. Beginning with an overview of recent developments, the book highlights the most popular ionization methods and illustrates the diversity of strategies employed in the characterization and sequencing of DNA and RNA oligomers, nucleosides, nucleotides, and adducts. It describes studies performed on deoxyinosine and its analogues and provides an introduction to tandem mass spectrometry (MS/MS).

Next, the contributors examine mass spectrometric application in the study of cyclic nucleotides in biochemical signal transduction. They analyze urinary modified nucleosides and explore DNA adducts. They discuss isotope labeling of DNA-mass spectrometry (ILD-MS) and examine various uses of electrospray ionization mass spectrometry (ESI-MS). The book reviews recent progress in the direct MS characterization of noncovalent nucleic acid-protein complexes, explores the interaction and ionization of guanidine-derived compounds with highly acidic biomolecules, and examines quantitative identification of nucleic acids via signature digestion products detected using mass spectrometry.

The book describes a direct-infusion ESI-MS approach that can serve as a screening technique for the presence of modified nucleosides from small RNAs. Lastly, it discusses the LC-MS/MS method for the *in vitro* replication studies on damage-containing DNA substrates, and concludes with an examination of the influence of metal ions on the structure and reactivity of nucleic acids.

The exciting developments in mass spectrometry technology have fueled incredible advances in our understanding of nucleic acids and their complexes. The contributions presented in this volume capture the range of these advances, helping to inspire new findings and avenues of research.

From reader reviews:

Gilbert Kimmel:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each guide has different aim or goal; it means that publication has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they acquire because their hobby is actually reading a book. Consider the person who don't like examining a book? Sometime, person feel need book whenever they found difficult problem or maybe exercise. Well, probably you will want this Mass Spectrometry of Nucleosides and Nucleic Acids.

Ignacio Lewis:

Now a day individuals who Living in the era exactly where everything reachable by connect with the internet and the resources included can be true or not require people to be aware of each facts they get. How people have to be smart in obtaining any information nowadays? Of course the solution is reading a book. Examining a book can help people out of this uncertainty Information specifically this Mass Spectrometry of Nucleosides and Nucleic Acids book as this book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you may already know.

Amber Payne:

This Mass Spectrometry of Nucleosides and Nucleic Acids are usually reliable for you who want to be described as a successful person, why. The key reason why of this Mass Spectrometry of Nucleosides and Nucleic Acids can be one of many great books you must have will be giving you more than just simple examining food but feed an individual with information that maybe will shock your prior knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Mass Spectrometry of Nucleosides and Nucleic Acids giving you an enormous of experience including rich vocabulary, giving you trial of critical thinking that we know it useful in your day exercise. So , let's have it and revel in reading.

Eddie Grabowski:

Reserve is one of source of information. We can add our understanding from it. Not only for students but in addition native or citizen require book to know the up-date information of year to help year. As we know those books have many advantages. Beside most of us add our knowledge, can bring us to around the world. By the book Mass Spectrometry of Nucleosides and Nucleic Acids we can take more advantage. Don't one to be creative people? To be creative person must want to read a book. Just simply choose the best book that ideal with your aim. Don't end up being doubt to change your life by this book Mass Spectrometry of Nucleosides and Nucleic Acids. You can more desirable than now.
