Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics)

Ernesto G. Arias, Hal Eden, Gerhard Fischer

The Envisionment and Discovery Collaboratory (EDC) is a long-term research platform exploring immersive socio-technical environments in which stakeholders can collaboratively frame and solve problems and discuss and make decisions in a variety of application domains and different disciplines.

The knowledge to understand, frame, and solve these problems does not already exist, but is constructed and evolves in ongoing interactions and collaborations among stakeholders coming from different disciplines providing a unique and challenging environment to study, foster, and support human-centered informatics, design, creativity, and learning.

At the social level, the EDC is focused on the collaborative construction of artifacts rather than the sharing of individually constructed items. It brings individuals together in face-to-face meetings, encouraging and supporting them to engage, individually and collectively, in action and reflection. At the technological level, the EDC integrates tabletop computing environments, tangible objects, sketching support, geographic information systems, visualization software, and an envisioned virtual implementation.

This book is based on 20 years of research and development activities that brought together interdisciplinary teams of researchers, educators, designers, and practitioners from different backgrounds. The EDC originated with the merging of two research paradigms from disparate disciplines to build on the strengths, approaches, and perspectives of each. This book describes the artifacts and scenarios that were developed, with the goal of providing inspiration for human-centered informatics not focused on technologies in search of a purpose but on the development of systems supporting stakeholders to explore personally meaningful problems.

These developments have inspired numerous research and teaching activities. The challenges, prototypical systems, and lessons learned represent important milestones in the development and evolution of the EDC that are relevant for future research activities and practices in human-centered informatics.

From reader reviews:

Michelle Pacheco:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, going to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? Could possibly be reading a book can be option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to consider look for book, may be the e-book untitled Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics) can be good book to read. May be it could be best activity to you.

Chad Wood:

Is it anyone who having spare time then spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics) can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?

Thomas Baier:

That e-book can make you to feel relax. This kind of book Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics) was vibrant and of course has pictures around. As we know that book Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics) has many kinds or category. Start from kids until teens. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading that will.

Mary Ransom:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is prepared or printed or highlighted from each source which filled update of news. Within this modern era like currently, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just seeking the Envisionment and Discovery Collaboratory (Synthesis Lectures on Human-Centered Informatics) when you required it?
