New Technologies in Language Learning A. Zettersten

This is the first book to provide a comprehensive survey of the use of new technologies in language learning. In order to explain how new technologies open up possibilities for language learning, numerous practical experiments made with various electronic media are analysed. They include the use of microcomputers, videotex (viewdata), teletext, video and videodiscs. In addition, artificial intelligence, synthetic speech, robots, distance education, language testing as well communicative training and the problem of accuracy and fluency are dealt with.
