Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) L.

Pfister, Hubert H. G. Savenije, Fabrizio Fenicia

Leonardo Da Vinci (1452-1519) was not only one of the greatest artists of his time, he was also a great engineer and scientist. A large part of his scientific work was dedicated to understanding the movement, circulation and physical characteristics of water in its different forms. This book makes Leonardo Da Vinci's contributions to the science of water accessible to a wider public and compares his ideas with our present knowledge. Fascinating, revealing and inspiring, Leonardo Da Vinci's Water Theory opens up a new history to the study of water. Two hundred years before Newton, Perrault and Halley, Leonardo Da Vinci was doing hypothesis-driven science and describing and classifying hydrological processes. For example, he came close to the modern definition of the hydrological cycle, recognising that water passes through the major river systems countless times, summing up to volumes much greater than those contained in the worlds oceans. Pfister, Savenije and Fenicia carefully report Da Vincis seminal work and provide a modern hydrological context.

The International Association of Hydrological Sciences is the world's premier member-based organization promoting the study and practice of Hydrology. Our books are authored, edited and produced at the highest level of quality, with the most current and thorough research.

Our publications and our work advance the science and the professional practice of Hydrology in a variety of Science and Engineering fields around the world.

The areas that we publish in include:

- Ground water
- Surface water
- Snow and ice hydrology
- Drought and desertification
- Runoff modelling
- Watershed
- Remote sensing
- Water quality
- Water resources and management
- Ecohydrology/hydro-ecology
- Erosion and sediment
- Tracer hydrology

From reader reviews:

Berneice Ritzman:

The reserve untitled Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) is the e-book that recommended to you to see. You can see the quality of the guide content that will be shown to you actually. The language that article author use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, therefore the information that they share to you personally is absolutely accurate. You also will get the e-book of Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) from the publisher to make you much more enjoy free time.

Janelle Smith:

The book Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) has a lot details on it. So when you make sure to read this book you can get a lot of advantage. The book was compiled by the very famous author. Tom makes some research prior to write this book. This book very easy to read you can get the point easily after reading this book.

Coleen Isabel:

People live in this new moment of lifestyle always aim to and must have the extra time or they will get great deal of stress from both way of life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not just a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading guides. It can be your alternative throughout spending your spare time, the actual book you have read is Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications).

Helen Williams:

That e-book can make you to feel relax. This book Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) was colourful and of course has pictures around. As we know that book Leonardo Da Vinci's Water Theory: On the origin and fate of water (IAHS Special Publications) has many kinds or style. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading in which.
