Electronics and Computer Acronyms Phil Brown

Electronics and Computer Acronyms presents a list of almost 2,500 acronyms related to electronics and computers. The material for this book is drawn from a number of subject areas, including electrical, electronics, computers, telecommunications, fiber optics, microcomputers/microprocessors, audio, video, and information technology. The acronyms also encompass avionics, military, data processing, instrumentation, units, measurement, standards, services, organizations, associations, and companies.

This dictionary offers a comprehensive and broad view of electronics and all that is associated with it. Cross-references are provided in the form of abbreviations within parentheses. For example, the entry for CCD, charge-coupled device, provides three cross-references: charge-transfer device (CTD), metal-oxide semiconductor (MOS), and capacitor (C,6). To broaden further the explanation, if required, referral to entries CTD, MOS, and C part 6 (C is a multiple entry with 10 parts) is advised. The system of prefixes and units used in the *Système International d'Unités* is followed throughout the book.

This monograph is intended for students, engineers, and technicians as well as those with an interest in computers and electronics.
