## Recombinant DNA Methodology (Selected Methods in Enzymology)

Recombinant DNA methods are powerful, revolutionary techniques that allow the isolation of single genes in large amounts from a pool of thousands or millions of genes and the modification of these isolated genes or their regulatory regions for reintroduction into cells for expression at the RNA or protein levels. These attributes lead to the solution of complex biological problems and the production of new and better products in the areas of medicine, agriculture, and industry.

**Recombinant DNA Methodology**, a volume in the **Selected Methods in Enzymology** series produced in benchtop format, contains a selection of *key* articles from Volumes 68, 100, 101, 153, 154, and 155 of **Methods in Enzymology**. The essential and widely used procedures provided at an affordable price will be an invaluable aid to the graduate student and the researcher.

### Key Features

- \* Enzymes in DNA research
- \* DNA isolation, hybridization, and cloning
- \* DNA sequence analysis
- \* cDNA cloning
- \* Gene products
- \* Identification of cloned genes and mapping of genes
- \* Monitoring cloned gene expression
- \* Cloning and transferring of genes into yeast cells
- \* Cloning and transferring of genes into plant cells
- \* Cloning and transferring of genes into animal cells
- \* Site-directed mutagenesis
- \* Protein engineering
- \* Expression vectors

### **From reader reviews:**

#### **Mary Russell:**

Throughout other case, little people like to read book Recombinant DNA Methodology (Selected Methods in Enzymology). You can choose the best book if you appreciate reading a book. Given that we know about how is important a new book Recombinant DNA Methodology (Selected Methods in Enzymology). You can add know-how and of course you can around the world by a book. Absolutely right, because from book you can learn everything! From your country until finally foreign or abroad you can be known. About simple issue until wonderful thing you may know that. In this era, we can easily open a book as well as searching by internet system. It is called e-book. You need to use it when you feel weary to go to the library. Let's go through.

#### **Dorothy Payne:**

This Recombinant DNA Methodology (Selected Methods in Enzymology) book is not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this guide incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. That Recombinant DNA Methodology (Selected Methods in Enzymology) without we understand teach the one who looking at it become critical in contemplating and analyzing. Don't be worry Recombinant DNA Methodology (Selected Methods in Enzymology) can bring when you are and not make your handbag space or bookshelves' come to be full because you can have it within your lovely laptop even cellphone. This Recombinant DNA Methodology (Selected Methods in Enzymology) having great arrangement in word along with layout, so you will not truly feel uninterested in reading.

#### **Mildred Vang:**

Exactly why? Because this Recombinant DNA Methodology (Selected Methods in Enzymology) is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will distress you with the secret the idea inside. Reading this book alongside it was fantastic author who also write the book in such remarkable way makes the content interior easier to understand, entertaining method but still convey the meaning totally. #### **Darlene Gutierrez:**

Do you have something that you prefer such as book? The guide lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not hoping Recombinant DNA Methodology (Selected Methods in Enzymology) that give your enjoyment preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the opportunity for people to know world a great deal better then how they react toward the world. It can't be mentioned constantly that reading routine only

for the geeky particular person but for all of you who wants to always be success person. So , for all of you who want to start examining as your good habit, you may pick Recombinant DNA Methodology (Selected Methods in Enzymology) become your own personal starter.
