Advances and Technical Standards in Neurosurgery, Vol. 35 John D. Pickard

The ambition of all successful editorial boards has been to provide an opportunity for mature scholarship and reflection, not constrained by artificial limits on space. The series provides a remarkable account of progress over the past 35 years, both with regard to advances, detailed descriptions of standard operative procedures and in-depth reviews of established knowledge. The present volume is a new venture and is focused on a single topic namely - low-grade gliomas. It incorporates a multidisciplinary approach that should appeal to both experienced neurosurgeons and young neurosurgeons in training alike.
