Real-Time Systems Development

Rob Williams

Real-Time Systems Development Rob Williams
Real-time Systems Development is a text for computing students who want to understand more about the development of software for real-time applications, involving concurrent programming, multi-tasking, data i/o and embedded processors.

The book has been written to cover single semester final year undergraduate options or MSc modules in the area of real-time systems design and implementation. Assuming a certain level of general systems design and programming experience, this text will extend students knowledge and skills into an area of computing which has increasing relevance in a modern world of telecommunications and 'intelligent' equipment using embedded microcontrollers.

* Concise treatment delivers material in manageable sections
* Includes handy glossary, references and practical exercises based on familiar scenarios
* Supporting website contains slides, solutions to problems and software examples

From reader reviews:

Edward Schanz:

What do you consider book? It is just for students as they are still students or the item for all people in the world, what best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't would like do that. You must know how great in addition to important the book Real-Time Systems Development. All type of book could you see on many options. You can look for the internet resources or other social media.

Mark Blanding:

Is it you actually who having spare time after that spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Real-Time Systems Development can be the solution, oh how comes? It's a book you know. You are thus out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Linda Mays:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's heart and soul or real their passion. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Real-Time Systems Development can make you feel more interested to read.

Flora Gordon:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from a book. Book is published or printed or highlighted from each source that will filled update of news. With this modern era like right now, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just seeking the Real-Time Systems Development when you essential it?
