Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! Amit Saha

Doing Math with Python shows you how to use Python to delve into high school—level math topics like statistics, geometry, probability, and calculus. You'll start with simple projects, like a factoring program and a quadratic-equation solver, and then create more complex projects once you've gotten the hang of things.

Along the way, you'll discover new ways to explore math and gain valuable programming skills that you'll use throughout your study of math and computer science. Learn how to:

- Describe your data with statistics, and visualize it with line graphs, bar charts, and scatter plots
- Explore set theory and probability with programs for coin flips, dicing, and other games of chance
- Solve algebra problems using Python's symbolic math functions
- Draw geometric shapes and explore fractals like the Barnsley fern, the Sierpinski triangle, and the Mandelbrot set
- Write programs to find derivatives and integrate functions

Creative coding challenges and applied examples help you see how you can put your new math and coding skills into practice. You'll write an inequality solver, plot gravity's effect on how far a bullet will travel, shuffle a deck of cards, estimate the area of a circle by throwing 100,000 "darts" at a board, explore the relationship between the Fibonacci sequence and the golden ratio, and more.

Whether you're interested in math but have yet to dip into programming or you're a teacher looking to bring programming into the classroom, you'll find that Python makes programming easy and practical. Let Python handle the grunt work while you focus on the math.

From reader reviews:

Lila Dixon:

Now a day individuals who Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not involve people to be aware of each details they get. How individuals to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading through a book can help individuals out of this uncertainty Information mainly this Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! book because book offers you rich details and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you know.

Keith Abell:

Nowadays reading books become more than want or need but also turn into a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want drive more knowledge just go with training books but if you want really feel happy read one with theme for entertaining including comic or novel. The actual Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! is kind of guide which is giving the reader unstable experience.

Paul Day:

It is possible to spend your free time to learn this book this book. This Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! is simple to bring you can read it in the recreation area, in the beach, train and soon. If you did not have got much space to bring the printed book, you can buy typically the e-book. It is make you better to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

William Black:

This Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! is completely new way for you who has fascination to look for some information since it relief your hunger info. Getting deeper you in it getting knowledge more you know or you who still having bit of digest in reading this Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! can be the light food for you personally because the information inside this particular book is easy to get simply by anyone. These books produce itself in the form which is reachable by anyone, sure I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is no in reading a book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss this! Just read this e-book style for your better life and also knowledge.
