Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series)

Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series)

The boreal forest is the northern-most woodland biome, whose natural history is rooted in the influence of low temperature and high-latitude. Alaska's boreal forest is now warming as rapidly as the rest of Earth, providing an unprecedented look at how this cold-adapted, fire-prone forest adjusts to change.

This volume synthesizes current understanding of the ecology of Alaska's boreal forests and describes their unique features in the context of circumpolar and global patterns. It tells how fire and climate contributed to the biome's current dynamics. As climate warms and permafrost (permanently frozen ground) thaws, the boreal forest may be on the cusp of a major change in state. The editors have gathered a remarkable set of contributors to discuss this swift environmental and biotic transformation. Their chapters cover the properties of the forest, the changes it is undergoing, and the challenges these alterations present to boreal forest managers.

In the first section, the reader can absorb the geographic and historical context for understanding the boreal forest. The book then delves into the dynamics of plant and animal communities inhabiting this forest, and the biogeochemical processes that link these organisms. In the last section the authors explore landscape phenomena that operate at larger temporal and spatial scales and integrates the processes described in earlier sections. Much of the research on which this book is based results from the Bonanza Creek Long-Term Ecological Research Program. Here is a synthesis of the substantial literature on Alaska's boreal forest that should be accessible to professional ecologists, students, and the interested public.

From reader reviews:

Ashley McKay:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each book has different aim or perhaps goal; it means that book has different type. Some people truly feel enjoy to spend their a chance to read a book. They are really reading whatever they have because their hobby is reading a book. What about the person who don't like examining a book? Sometime, man or woman feel need book once they found difficult problem or exercise. Well, probably you'll have this Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series).

William Fiscus:

The book Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series) can give more knowledge and also the precise product information about everything you want. So why must we leave a good thing like a book Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series)? A number of you have a different opinion about book. But one aim that will book can give many information for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or facts that you take for that, you could give for each other; you may share all of these. Book Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series) has simple shape but you know: it has great and massive function for you. You can seem the enormous world by wide open and read a e-book. So it is very wonderful.

Michael Kruger:

The book with title Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series) includes a lot of information that you can find out it. You can get a lot of benefit after read this book. This particular book exist new know-how the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you within new era of the glowbal growth. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Vicky Gamez:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't evaluate book by its handle may doesn't work here is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer may be Alaska's Changing Boreal Forest (Long-Term Ecological Research Network Series) why because the great cover that make you consider concerning the content will not disappoint you. The inside or content is usually fantastic as the outside or cover. Your reading 6th sense will directly assist you to pick up this book.
