Visualizing Mathematics with 3D Printing Henry Segerman

Wouldn't it be great to experience three-dimensional ideas in three dimensions? In this book, the first of its kind, mathematician and mathematical artist Henry Segerman takes readers on a fascinating tour of two-, three-, and four-dimensional mathematics, exploring Euclidean and non-Euclidean geometries, symmetry, knots, tilings, and soap films. *Visualizing Mathematics with 3D Printing* includes more than 100 color photographs of 3D printed models. Readers can take the book's insights to a new level by visiting its sister website, 3dprintmath.com, which features virtual three-dimensional versions of the models for readers to explore. These models can also be ordered online or downloaded to print on a 3D printer.

Combining the strengths of book and website, this volume pulls higher geometry and topology out of the realm of the abstract and puts it into the hands of anyone fascinated by mathematical relationships of shape. With the book in one hand and a 3D printed model in the other, readers can find deeper meaning while holding a hyperbolic honeycomb, touching the twists of a torus knot, or caressing the curves of a Klein quartic.

From reader reviews:

Crystal Freeman:

The book Visualizing Mathematics with 3D Printing make you feel enjoy for your spare time. You may use to make your capable a lot more increase. Book can being your best friend when you getting anxiety or having big problem using your subject. If you can make studying a book Visualizing Mathematics with 3D Printing to be your habit, you can get more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You can know everything if you like available and read a book Visualizing Mathematics with 3D Printing. Kinds of book are a lot of. It means that, science guide or encyclopedia or other people. So , how do you think about this reserve?

Amanda Despain:

A lot of people always spent all their free time to vacation or maybe go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you need to try to find a new activity that is look different you can read the book. It is really fun for yourself. If you enjoy the book which you read you can spent 24 hours a day to reading a publication. The book Visualizing Mathematics with 3D Printing it is very good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. Should you did not have enough space to create this book you can buy typically the e-book. You can m0ore easily to read this book from the smart phone. The price is not very costly but this book has high quality.

Jerry Lyon:

Reading a book for being new life style in this year; every people loves to learn a book. When you study a book you can get a large amount of benefit. When you read books, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you would like get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The Visualizing Mathematics with 3D Printing provide you with new experience in reading a book.

Sergio Terry:

Many people spending their time by playing outside along with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to invest your whole day by examining a book. Ugh, think reading a book can really hard because you have to accept the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smartphone. Like Visualizing Mathematics with 3D Printing which is keeping the e-book version. So , why not try out this book? Let's observe.
