Covering the process from basic principles to developed designs, the book outlines the range of project types and services that urban designers can offer and sets out a set of general operating guidelines and procedures for:

- Developing a master plan, including techniques for engaging citizens in the design process and technical analysis to evaluate the physical form of the neighborhood, centered on a design charrette with public participation;
- Preparing a pattern book to guide residential construction in a new traditional town, including the documentation of architectural and urban precedents in a form that can be used by architects and builders;
- Implementing contextual architectural design, including methods of applying the essential qualities of traditional architecture in many styles to modern programs and construction techniques.
